Coding & Solution

Date	9-7 2026
Team ID	Individual
Project Name	Loan approval prediction
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/badiginchalahemavathi-sys/AI-ML-Smartbridge_Project_Loan-_Approval_prediction
Programming Language(s)	[e.g., Python, JavaScript, HTML,CSS]
Framework(s) Used	[Flask, scikit learn]

Key Features Implemented	User Login, Loan Application Form, Loan Approval Prediction, Result Display, Model Integration
Pending / Incomplete Features	None
Setup / Run Instructions	Install Python libraries, run app.py, open http://127.0.0.1:5000 in the browser

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The Smart Lender project was developed using Python, Flask, and Machine Learning The application predicts loan approval based on applicant details and provides accurate prediction results through afriendly web interface.
